

THE **KEY ASSETS**OFFICE PROJECT

Rawson's Fanfare range has been chosen in 2 distinct colours for the Key Assets office project in Birmingham.

The result is a covering which meets the planned aesthetic and offers a soft, quiet and comfortable surface. Rawson Carpet Solutions have been supplying the office and Education sectors for over 50 years. As the markets have evolved, so too has the product range and customer support. Hannah Sidley of CB Interiors stated: 'We were looking for a heavy contract carpet which worked with our design concept portraying a contemporary look. The Fanfare Range supplied by Rawson carpets provided this, being solution dyed nylon and with BRE A+ environmental accreditation. Plus being fully supported as a UK manufacturer we were confident about meeting the deadline as the supply wouldn't be an issue.'

Fanfare is a range that can be laid tessellated or broadloom, the result is a tile which offers the aesthetics of a seamless, monolithic floor. The sinuous look complements the space and offers great durability with castor chair resistance. The contract carpet tile is constructed using high grade solution dyed nylon and as such offers great cleaning results.

Rawson values the Environment. All considerations for ethical trading down the manufacturing and supply line and the responsible choice of REACH compliant materials is paramount. In addition, carpets are provided with the BRE Green Guide Individual assessment, achieving A+ and this offers clients the assurance of an environmentally conscious product and manufacturer. Indeed there are products in the range that are fully recyclable. WE Rawson, A UK Company since 1865, is ISO9001:2015 accredited with 3 divisions and a heritage past as a reputed long standing privately owned UK Manufacturer.
