

Playtown Project - Southport

Rawson Carpet Solutions have been chosen to supply the Playtown play arena in Southport. DP Floors of Southport installed the heavy duty velour carpet tiles in two distinct colours of anthracite and rouge.

Southport's "Playtown" is a children's fitness area, it is a heavily used space with high foot traffic and a lot of noise. The requirement was for a durable carpet tile solution that offered a bright aesthetic to add to the 'fun' inspired space. This was met by Rawson Carpet Solutions with the class 33 rated Felkirk carpet tiles, which are a regular choice for such children spaces due to their exceptional durability.

The tiles are thick and provide a good level of sound reduction to add as much comfort to the environment. Polypropylene tiles are easily maintained with good options for stain removal.
